Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to communication filed on 9/20/2004.
2. Claim 2-16, 19-34, 36-51 and 71-81 are presented for examination.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-16, 19-34, 36-51 and 71-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over article by Marc Gunther titled "The trouble with advertising" hereinafter Gunther.

With respect to claims 76, 2, 16, 71, 19, 33, 81, 36, 50, 52, 74, 79, Gunther teaches a sweepstake system (page 1, paragraph IV). A host system computer system hosting a webpage, wherein the webpage includes a plurality of links and each of the plurality of links has an associated point value associated with the one of the plurality of hyperlinks(i.e. An avid sports fan or anyone with nothing better to do can click on enough links to earn points)(page 1, paragraph IV); wherein the host computer system awards at least one point to a user as a result of the user clicking on the one of the plurality of hyperlinks and wherein the user is given a number of at least one entry in a sweepstakes based on a number of points the user has been awarded for clicking on the one of the plurality of hyperlinks (i.e. the user can exchange earned points for \$1 million cash prize entries to a sweepstakes).

With respect to the newly amendment feature of at least two hyperlinks of the plurality of hyperlinks having different associated values. Gunther teaches getting points for clicking on links/hyperlinks. Gunther is silent as to the links having different or the same values associated with them and since Gunther also teaches the links are from different advertisers that gives incentives and compete for viewers (page 1, paragraphs IV, V and page 3) then it would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included associating different point values to the different advertisers links because such a modification allow different advertisers to offer a higher point value to users who click on the links to their websites and therefore increase their traffic flow.

Claims 3, 13, 20, 30, 37, 47, further recite storing registration information pertaining to the user, such as point information relating to the user. Official notice is taken that it is old and well known to store information in a database or the like for easier retrieval and access of the data. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included storing registration information or point information related to the user because such a modification would allow the system to keep user's information within easy access.

Claims 4-7, 9-12, 14-15, 21-24, 26-29, 31-32, 38-46, 48-49, 51, 55-56, 72, 73, 75, 77-78 and 80 are different implementation choices that can be implemented without major changes to the system. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included implementing the system

as recited by claims 4-7, 9-12, 14-15, 21-24, 26-29, 31-32, 38-46, 48-49, 51, 55-56, 64-66, 68-69 as designer's choices.

Claims 34 and 70 are similar in scope as claims 16, 33 rejected above and therefore rejected under similar rationale.

With respect to claims 8 and 25, Gunther do not specifically teach that one of the services is e-mail. E-mail is a common service offered in the on-line world. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included e-mail as one of the services offered.

Response to Arguments

4. Applicant's arguments with respect to claims 2-16, 19-34, 36-51 and 71-81 have been considered but are moot in view of the new ground(s) of rejection.
